

HOW TO CREATE A HOME FOR AN ALIEN

A MANUAL FOR THE HUMAN

1. Human should have an Open Mind.

2. Study the alien and design a home for its needs

One way to first study the alien then you can create a home base on their way of life and form

3. Be very lenient and understand the alien so there'd always be an understanding

4. Try to give them all the qualities and things needed.

Keep harmful and sharp objects away from the alien

Do not force the alien into its home, rather explain things to it so it feels comfortable around you

Be very patient in teaching and showing the alien what they should do, so there wouldn't be any misunderstanding.

Always provide a home for the alien (mind you, a comfortable one).

observe be sweet
them and observe let
do not force
